Add Seneca to Home screen

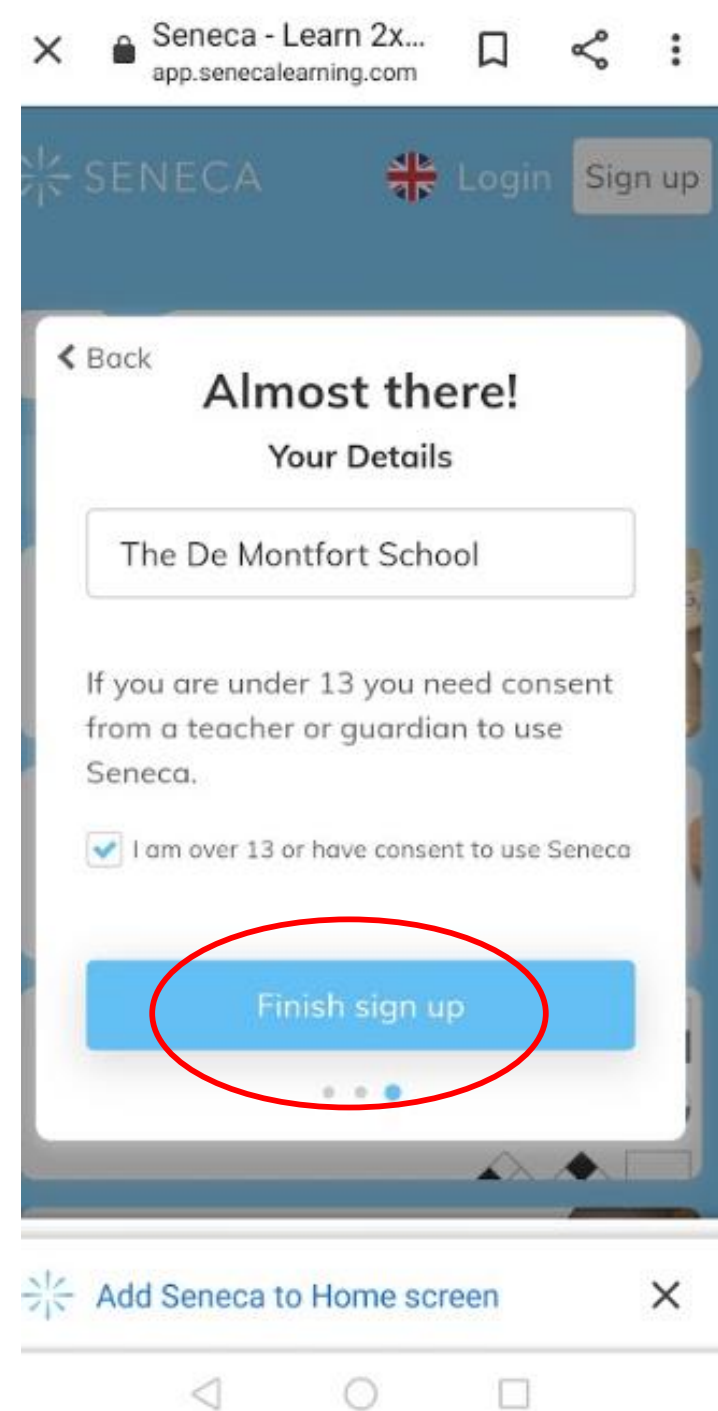

Click I'm a student

Start typing the de Montfort school (it will pop up) then check consent box – if you are under 13, please check with a parent or guardian first.

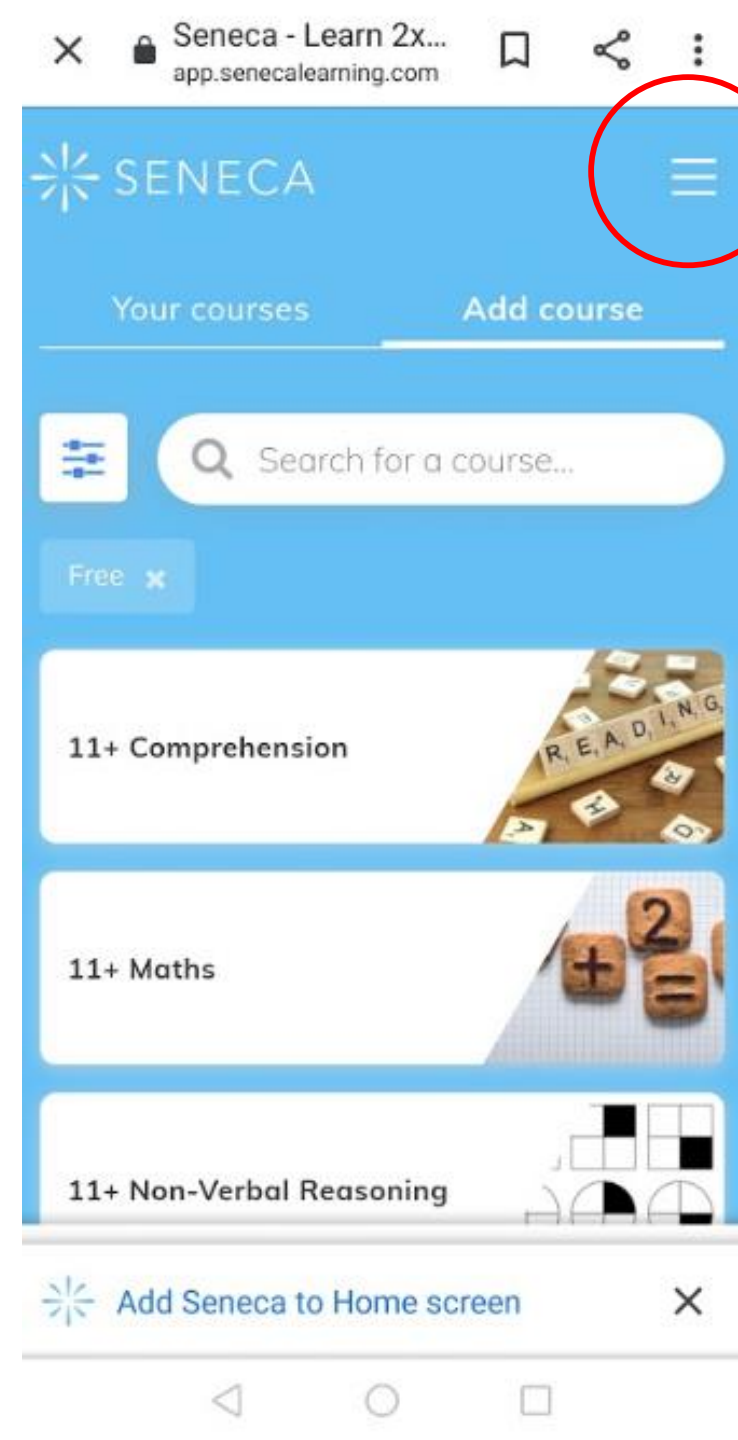

Finish sign up

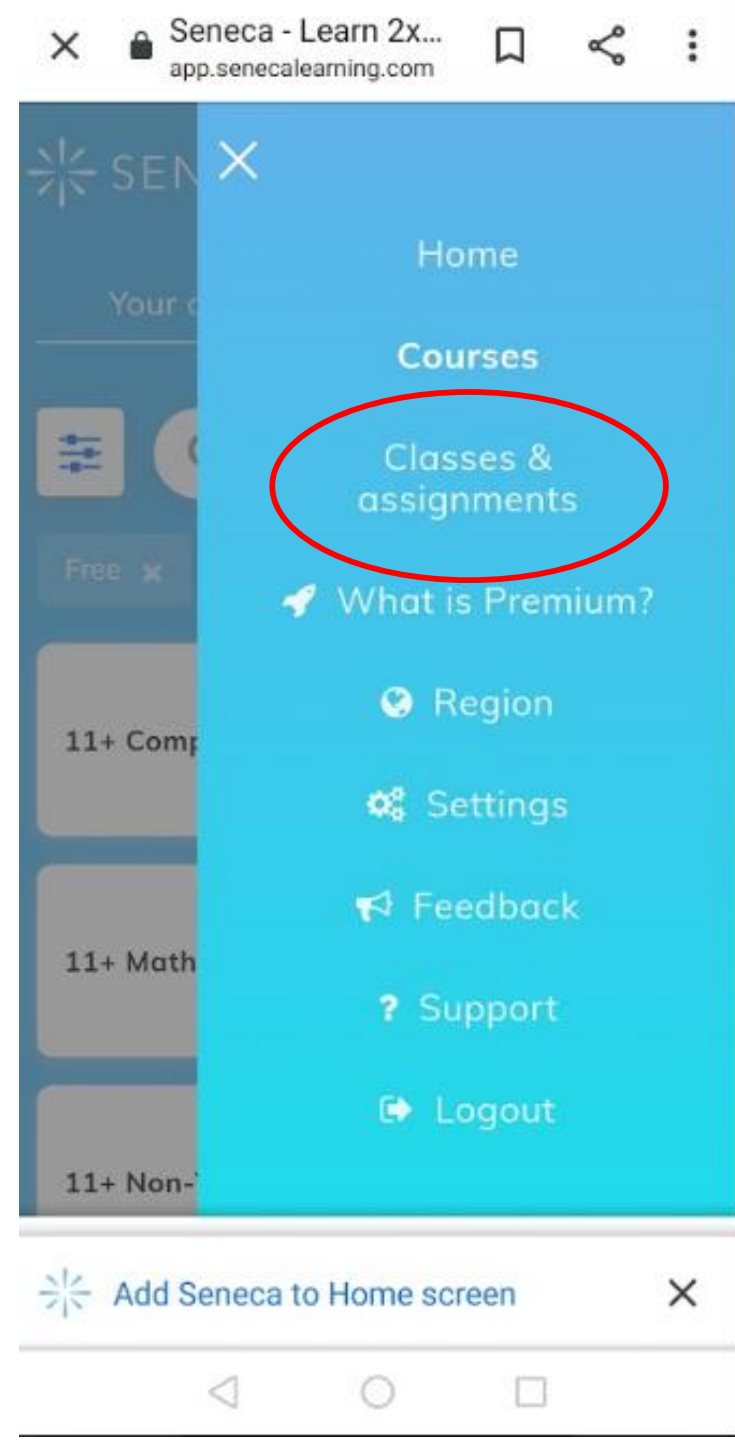

Click the menu bars in the top right hand corner of the page

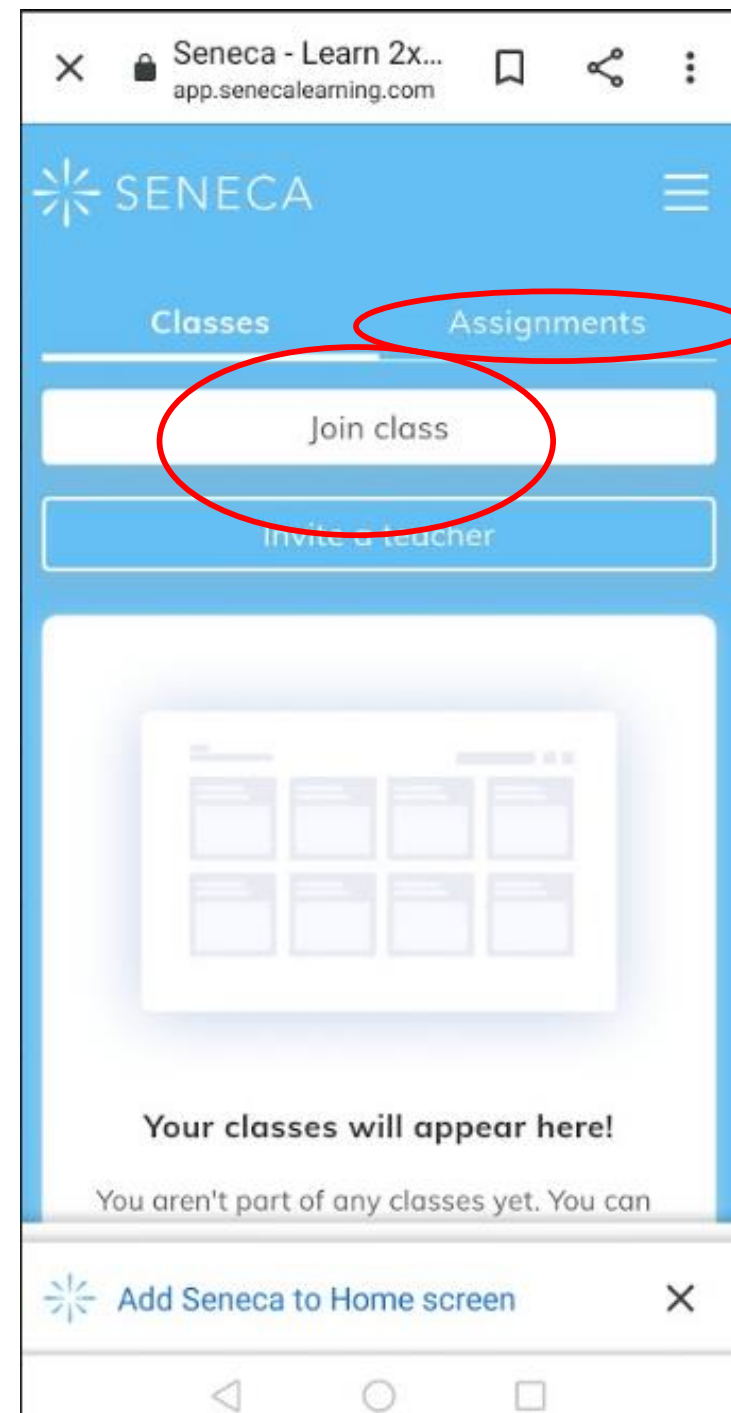

Click classes and assignments  
this is also how you will  
access your classes and  
assignments once you have  
added them.

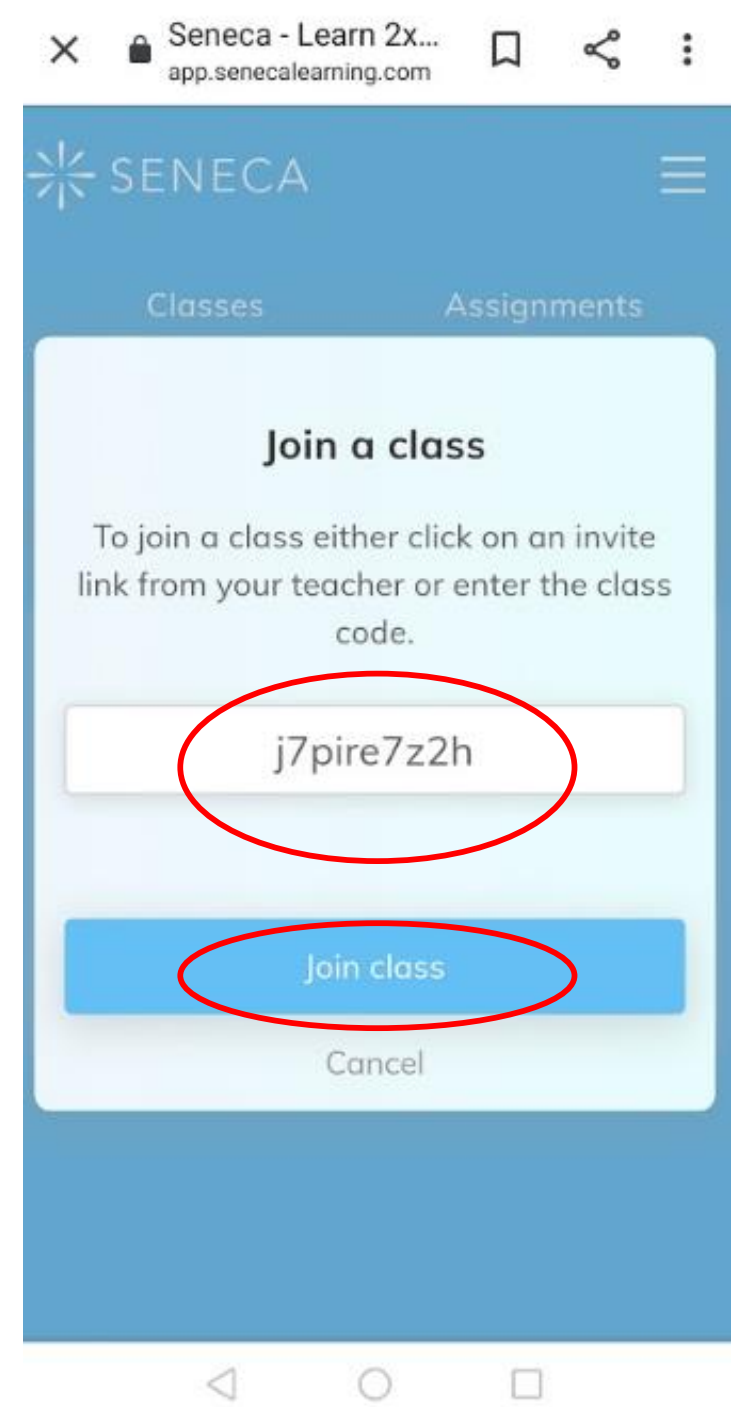

Click join class if you are joining a NEW class

if you are looking for assignments already set, click the Assignments tab

Type in the class code you have been given by your teacher – this is unique to your class, if you are not sure, contact your teacher

Then join class

You should see your class appear on the next page – click on this

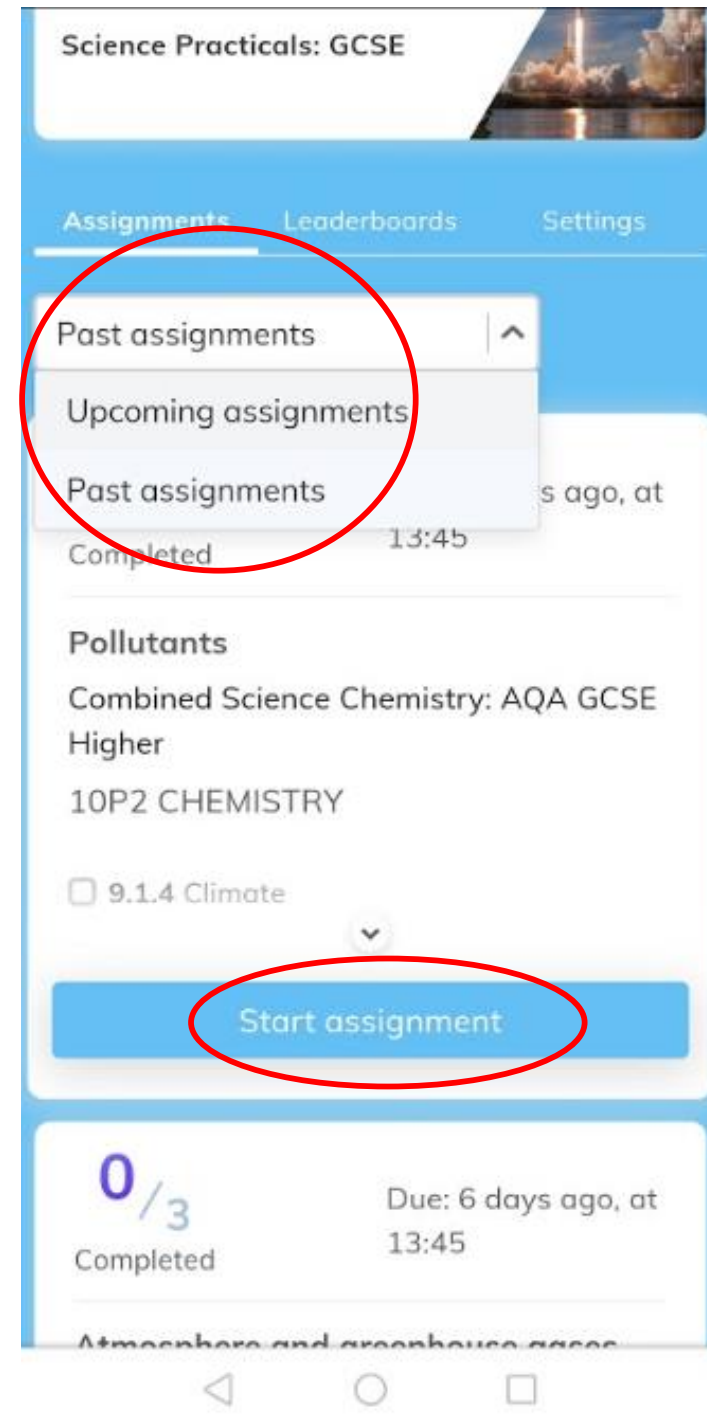

Scroll down the page to find assignments

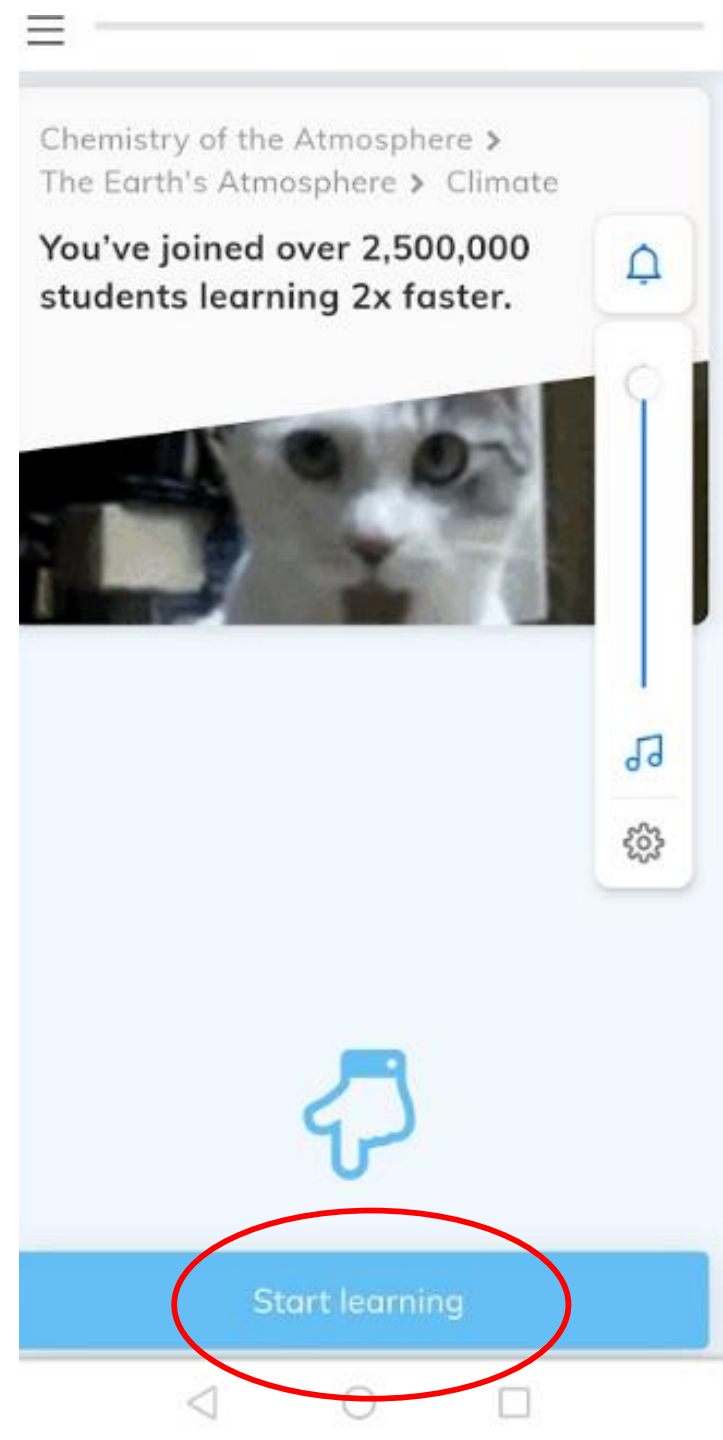

If no upcoming assignments,  
you may have missed a deadline  
– click the arrow and select  
**PAST ASSIGNMENTS**

Click on Start assignment for  
the one you need to complete

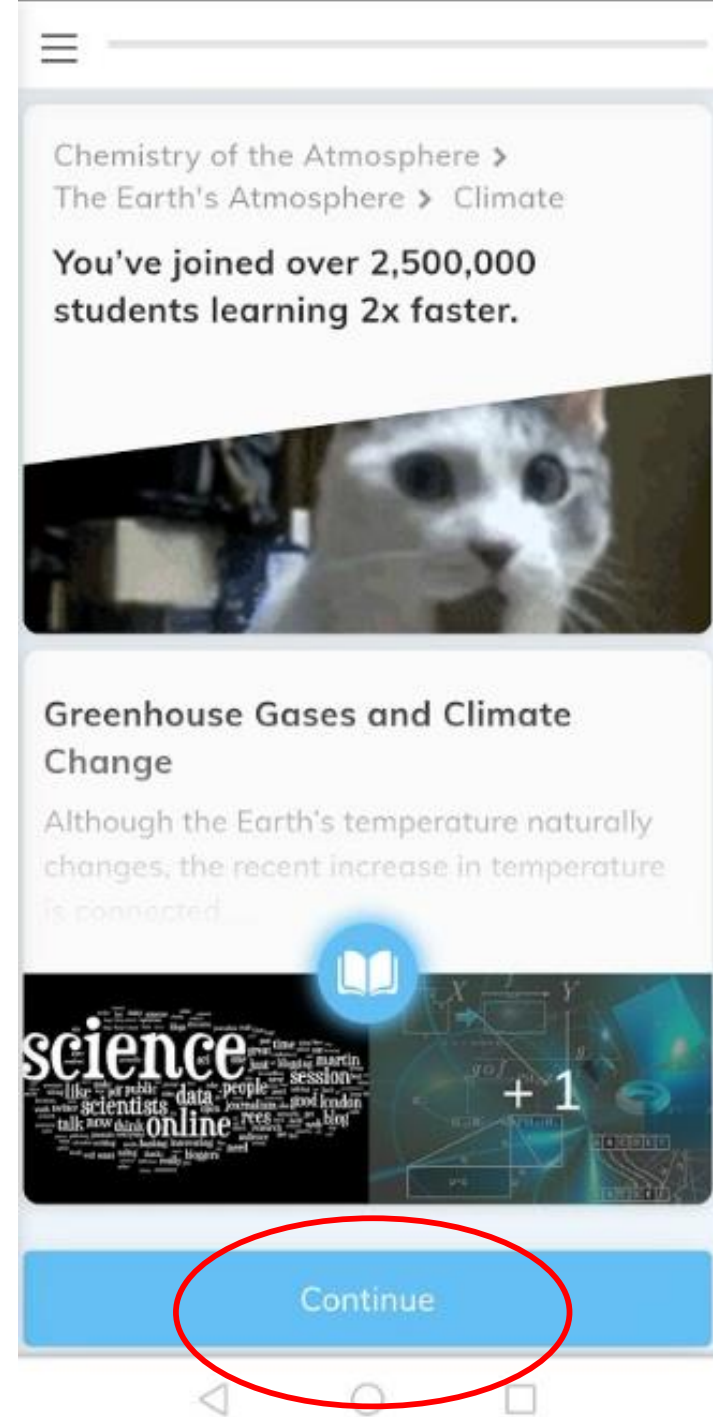

Click start learning

Work your way through the assignment – you need to read anything with a book logo on it and select or type in answers for questions.

The screenshot shows a mobile application interface. At the top, there is a hamburger menu icon. Below it, the text reads "Chemistry of the Atmosphere >" and "The Earth's Atmosphere > Climate". A promotional message states "You've joined over 2,500,000 students learning 2x faster." Below this is a banner image of a white cat. The main content area features the title "Greenhouse Gases and Climate Change" and a paragraph of text: "Although the Earth's temperature naturally changes, the recent increase in temperature is connected...". A blue circular icon with a white book symbol is positioned above a dark banner image. This banner image is split: the left side contains a word cloud with "science" as the largest word, and the right side shows a mathematical graph with a "+1" symbol. At the bottom of the screen, a blue button labeled "Continue" is circled in red. The Android navigation bar is visible at the very bottom.

Chemistry of the Atmosphere >  
The Earth's Atmosphere > Climate

You've joined over 2,500,000 students learning 2x faster.

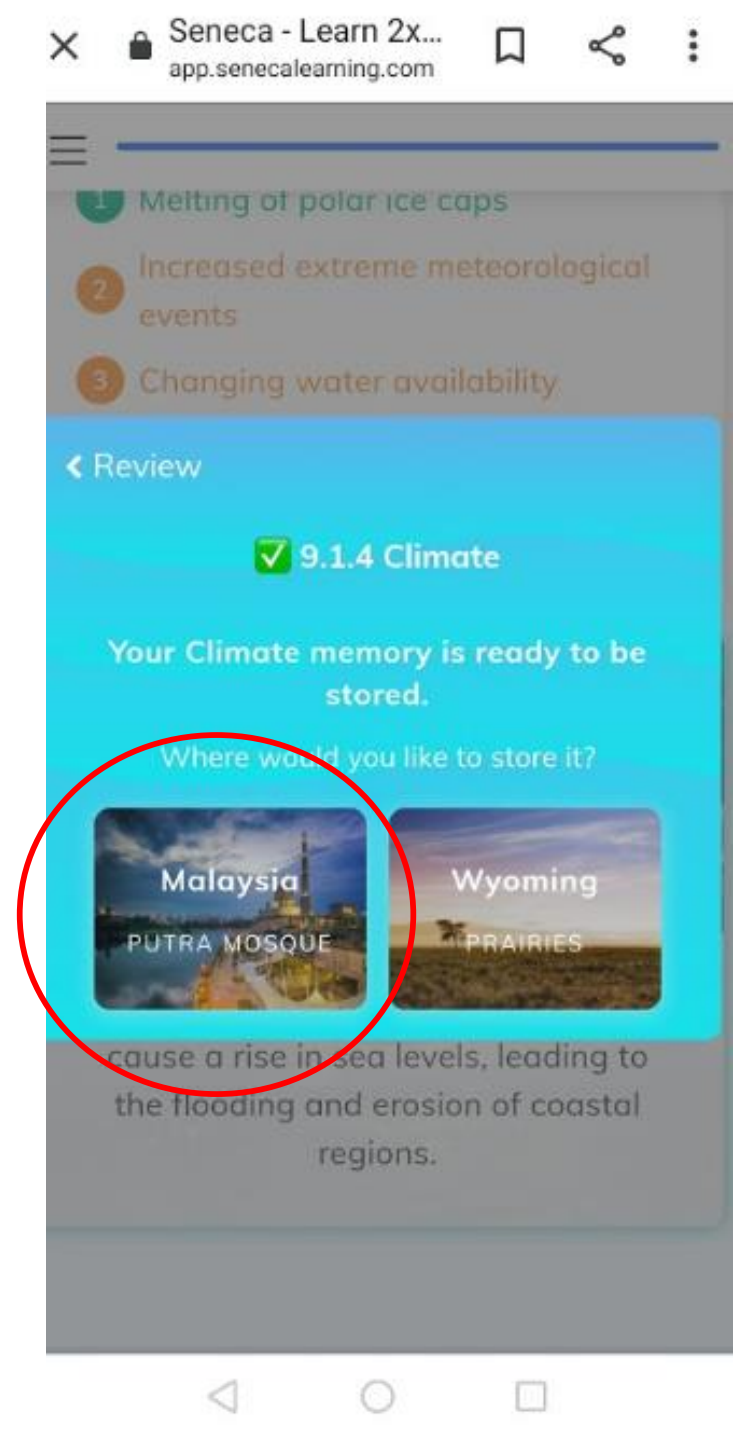

**Greenhouse Gases and Climate Change**

Although the Earth's temperature naturally changes, the recent increase in temperature is connected...
